Koštan
(*Echinochloa crus galli*)

Muhar
(*Setaria* spp.)

Lulj
(*Lolium* spp.)

A young Sirak plant (Sorghum halepense) is shown growing in a field of brown, clumpy soil. The plant has a single green leaf and a thin, reddish-brown stem. In the bottom right corner, there is a white label with a zipper graphic on its right edge. The label contains the text 'Sirak' in bold and '(Sorghum halepense)' in italics. The background is a close-up of the soil, which is composed of small, irregular clumps of brown earth. In the top right corner, another small green plant is partially visible.

Sirak
(*Sorghum halepense*)

Europski mračnjak
(*Abutilon theophrasti*)

Ambrozija
(*Ambrosia artemisiifolia*)

A close-up photograph of a field with severely cracked, dry, brown soil. Several small, young plants are emerging from the cracks. The plants have thin, upright stems and small, light-colored leaves. Some leaves appear slightly wilted or damaged. In the bottom right corner, there is a graphic element of a brown zipper with a silver pull, partially unzipped to reveal a bright green background.

Dvornici
(*Polygonum* spp.)

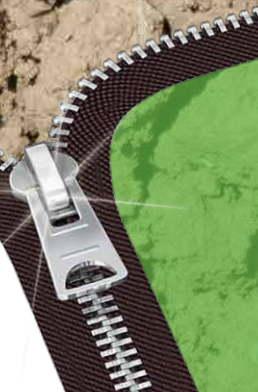

Loboda
(*Chenopodium* spp.)

Štir
(*Amaranthus spp.*)

Obični kužnjak
(*Datura stramonium*)

Čičak
(*Xanthium strumarium*)

Štavelj
(*Rumex spp.*)

Slak
(*Convolvulus spp.*,
Calystegia sepium)

Osjak
(*Cirsium arvense*)
