IMPLEMENTS
FOR PROFESSIONAL
FARMING

 NBM kosačice specijalno su dizajnirane za održavanje međurednih i otvorenih površina. Hardoks noževi obezbeđuju presecanje trave jednako i ravnomerno čime se ubrzava oporavak trave, a dekomponovanje organske materije je efikasnije. Prenos preko reduktora pruža bezbedno i dugoročno rešenje prenosa snage. Ove mašine dizajnirane su kako bi pružile maksimalnu bezbednost od odbačenih predmeta i svele mogućnost od povreda na minimum. Dostupne su u radnim zahvatima širine 1.20m-1.50m-1.80m i 2.30m

 NBM mowers are specially designed for green land maintenance. Hardox blades provides cut grass is spread thinly and evenly. After cutting the grass recovers is faster and decomposition took place in fertilizing the soil. Transmission over gearbox increaser provide safe and long term mowing. Machine has been designed in order to reduce risk of flying debris to the minimum. Available in versions 1.20m-1.50m-1.80m and 2.30m

Model Model	KS HP	Radna Širina (cm) Working Width (cm)	Broj Noževa N° Of Blades	Težina Weight (kg)	Kw
